**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to a method of performing a non-invasive measurement of a target analyte in patient's blood or tissue, the method comprising compiling a database of transdermal spectral measurements for plurality of subjects, deriving spectral shapes corresponding to one or more human contributing factors and normalizing the spectra based on the derived spectral shapes to generate a set of corrected spectra, classified in class 702, subclass 22, for example.
  - II. Claims 18-21, drawn to a spectrometer for in vivo analysis of target analyte in subject's blood tissue, classified in class 702, subclass 76, for example.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case measurement of target analyte in patient's blood can be performed with an entirely different product, such as Raman spectrometer, instead of the spectrophotometer of Group II.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
